

Bala Kattappuram

Balachandran (Bala) Kattappuram is the director of planning and project management at Peoples Gas in the city of Chicago. In this capacity, Bala is responsible for most capital and operations planning and project management functions at Peoples Gas. Bala manages the team primarily responsible for the planning and execution of the system modernization program (SMP).

Prior to Peoples Gas, Bala was a senior manager in the Capital Projects and Infrastructure practice at PricewaterhouseCoopers (PwC). Bala has worked for gas and electric utilities across the nation and has expertise in large capital programs, regulatory strategy, compliance and design engineering.

Before embarking on a career in management consulting, Bala worked as a power systems engineer at Florida Power and Light. While at FPL, he played a critical role in the engineering and construction of high voltage transmission lines. Bala also worked as a power systems design engineer at Sargent & Lundy in Chicago and research assistant for the United Nations Development Programme in New York.

Bala earned a bachelor's degree in electrical engineering from the University of South Alabama and a master's degree in public policy and management with a focus in energy policy from Carnegie Mellon University.
